Amelia Cooper trained as a plumber six years ago. Since then she has worked for a building company that carries out repairs to houses and business premises in the Birmingham area.

Amelia is now in a position where she wants to start her own plumbing business called *Lili Heating Ltd*. Even though there are many plumbers in the Birmingham area Amelia feels she has a unique selling point – she is a woman. Many female customers feel that they can relate more closely with a woman doing repairs in their homes.

As part of her business plan, Amelia has identified some clear aims and objectives and conducted a large amount of market research using the internet. Her target market requires clear advice on what work needs to be done and how much she will charge. Amelia also thinks she can cut down on advertising costs by getting her customers to recommend *Lili Heating Ltd* to their friends and families. For this to happen she knows that her work must be of the highest standard.

Amelia's business plan also included a wide range of financial information to help her forecast the potential success of the business and see if she would need an overdraft.

Figure 3

Ripple is an energy company aimed at providing green and renewable energy to homes and businesses across the UK. It is the country's first consumer-owned wind farm, generating green energy that does not have a damaging effect on the environment. Instead of customers paying *Ripple* to supply them with energy they become members of the business and buy a part of a wind farm located in a remote area of South Wales. Customers are then supplied with energy to their homes based on the amount of money they invested. The amount of money that customers can invest varies on their energy needs, but *Ripple* claims that it can supply energy cheaper than its competitors.

The process of becoming a member is very simple. Firstly, *Ripple* will ask customers a few questions to identify their energy needs. It will then create a green energy plan to establish how much each customer should invest into the wind farm. *Ripple* manages the wind farm and provides energy to each customer's home or business.

Ripple's business plan fits in with the UK government's cleaner energy strategy. This strategy includes plans for the country to have net zero carbon emissions by 2050 and to create 220,000 new jobs in the green energy sector of the economy.
